Topic

“Plasma cutting and gouging”

By Dave Noort

Hypertherm

In 1968, Hypertherm founder Dick Couch and colleague Bob Dean discovered a way to create a narrower plasma arc, capable of cutting metal more quickly and more accurately than ever before. Fifty years later, the founding principle of customer-focused innovation continues to drive product development at Hypertherm. And that spirit of innovation is one of the reasons why Hypertherm's plasma, laser, and waterjet systems, software, motion controls and consumables consistently outperform the competition in cut quality, productivity, and cost-efficiency.

Speaker's Bio:

In 1992 Dave Noort started his Electrician apprenticeship with Tottle Electric in Brantford, after completing his apprenticeship he began a new path into the laser industry at Trumpf Inc as a Field Service Engineer in their 3D high power Co2 laser department, After Trumpf Dave worked for Magna International as their Laser Process Coordinator at Modatek Systems in Milton. Dave Noort is currently the District Sales Manager for Hypertherm Inc. in Ontario and has been with Hypertherm since 2008. In his current role he manages distribution in Ontario.

The purpose of this presentation is to provide the audience with a comparative review of plasma cutting and gouging vs the other cutting methods and the applications of plasma cutting in industry.

March 6th, 2019

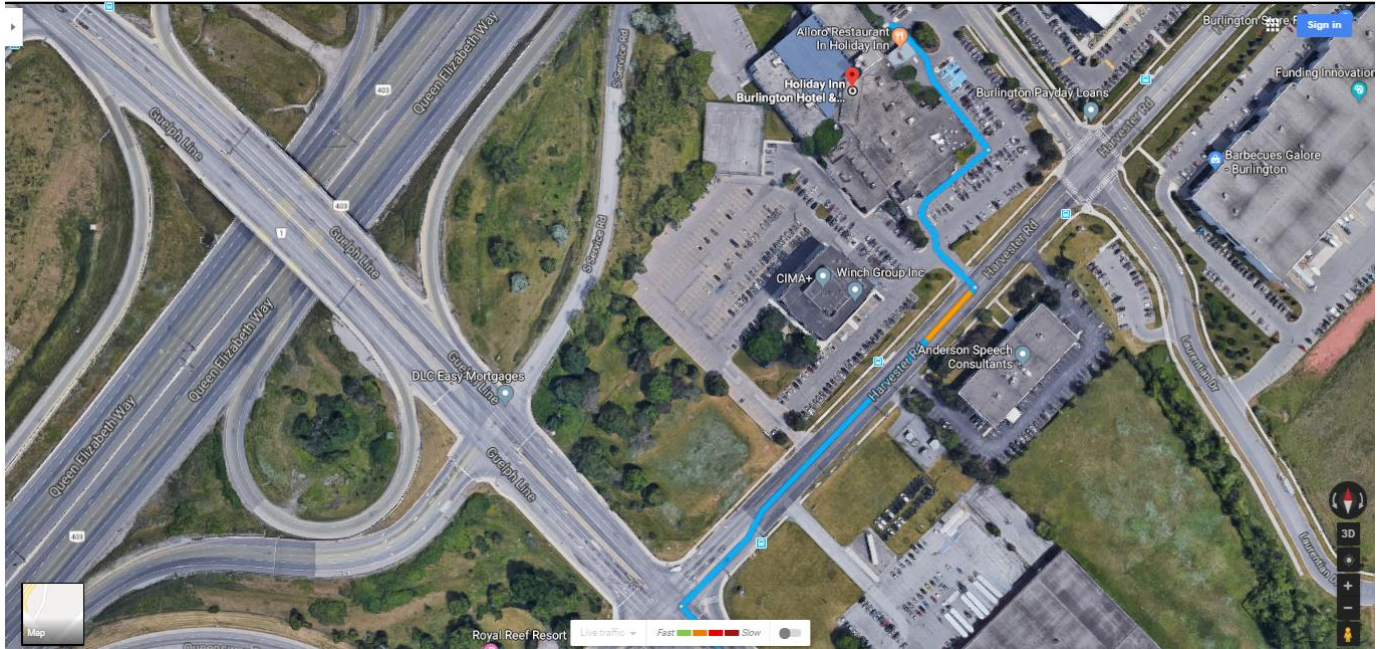

Topic: To be announced!

Contact any Hamilton Chapter Board Member for Tickets.

Note! You must reserve in advance

Please register by contacting Franco Piccoli (905) 317-6543 by Thursday Nov 29th, 2018
