CANWELD
CONFERENCE 2019
METAL FABRICATING - WELDING - FINISHING

CANWELD 2019 TENTH ANNIVERSARY: BRINGING THE WELDING, FABRICATING AND FINISHING INDUSTRY TOGETHER IN HALIFAX

For ten years, the CanWeld Conference has anticipated and served the needs of members and clients, developing and delivering high-quality programs and services that support client success.

Entering its tenth year in October, our world-class conference is back with more industry speakers and even more networking opportunities. A countrywide event that moves between the Eastern and Western provinces to serve a national audience, this year's conference will focus on:

- Agriculture
- Shipbuilding
- Submarine industries
- Offshore oil and gas
- Maintenance and repair
- Mining
- Aerospace

Attracting industry professionals from coast to coast, the CWB Group remains committed to providing the best in class service to all its stakeholders.

This year, we're excited to announce that our theme will be Current Waves. As a conference centred around different welding processes and the host city's proximity to the ocean, Current Waves is a thematic fit for this conference. The event does not only highlight the welding industry, but it increases the visibility of Canada's Atlantic region and the manufacturing sector which has recently been making waves in the news.

The conference will be held in Halifax, Nova Scotia from October 9-10, 2019 at the Halifax Convention Centre. More details will follow in the coming months.

ABOUT THE CONFERENCE

Every year, CanWeld brings together people from an extensive range of industry contributors such as educators, decision makers, influencers, suppliers and consultants. We reach out to these experts to ask for help and suggestions to make every conference better than the last. It serves as an excellent opportunity to discuss issues around current trends and advances in the welding and joining industry, health and safety and much more.

Attendees come from a variety of industries including:

- Oil and Gas
- Pipelines
- Power generation
- Petrochemical
- Mining
- Fabrication
- Manufacturing
- Steel & Shipbuilding
- Pulp & Paper
- Construction

Created for, and by the Canadian welding and fabricating industry, there is no better place to find the resources that you need to succeed in your chosen career path.

This year's conference will zero-in on the manufacturing and energy sectors, and most importantly, serve as a platform to connect with industry professionals and leaders nationally and internationally.

THE PERFECTLY-BALANCED CITY

Every year, we work tirelessly with our supplier committees to identify the welding tools, equipment, and processes that matter in our industry and truly showcase CanWeld as a national conference that highlights the east and west coast. This year's focus is the Atlantic provinces due to the big push in the shipbuilding and marine industries and we at the CWB Group felt that there was no better way to exhibit these sectors than to take you right where the action is.

ENDLESS NETWORKING OPPORTUNITIES FOR YOU!

Over 20 hours of networking with industry leaders

Keynote Luncheons

One-on-one meetings to ask questions and discuss issues affecting the industry today

CWB Welding Foundation Breakfast

TOPICS THAT YOU CAN LOOK FORWARD TO

Welding fabrication

Industry success

Business of welding

Welding inspection

Educating industry on advancements in welding

Technologies and processes

WHO SHOULD ATTEND?

Delegates for our tenth anniversary will travel from across Canada and the U.S. We're putting out an open call for engineers, technologists, technicians, welders, supervisors and managers! Come and find out all the ways that the CWB Group is looking to help YOU progress in industry and arm you with the necessary tools and resources to succeed.

The goal for this year's conference is to educate attendees in the latest welding technologies, and current issues affecting the welding industry. With numerous opportunities to hear from industry leaders and also have your voice heard, the CanWeld Conference is a one-stop shop for all things welding.

INDUSTRIES

- Agriculture
- Aircraft/Aerospace
- Appliances
- Chemicals/Petroleum
- Communications
- Construction
- Consulting/Engineering
- Defence
- Electronics/Computers
- Industrial and Commercial Machinery
- Energy
- Government/Military
- Medical/Surgical
- Mining
- Manufacturing
- Oil and Gas
- Plastic Products
- Research and Development
- Transportation
- Utilities
- Corporate Executive
- Sales and Marketing
- Manufacturing
- Production
- Foreman/Leader/Supervisor
- Manufacturing Engineer
- Design Engineer

KEY LEARNINGS

- Heat affected zone thermal cycles
- Measuring weld metal strength
- Managing welding fume
- Codes and Standards
- Weld Inspection
- Robotic welding
- Seam Tracking
- Weld Quality control
- Weld distortion control
- Comparing welding power source technologies
- Using electrode negative to improve mechanical properties
- Welding simulation
- Research
- Roundtable discussion, etc.

JOB TITLES

- Owner/Company Management
